

INTEGRATED ALARM TERMINAL

INTEGRATED ALARM PANEL with AUTOMATED DIALER

ORDERING INFORMATION

Integrated Alarm Terminal

DYNALC PART

62404-900

FEATURES:

- COTS replacement for IC/SM Alarm Switchboard with automated dialer capabilities.
- Interfaces with existing IC/SM style detectors or new Dynalec "smart" detectors.
- Alarm panel can be left unattended. Upon receiving an alarm, a predetermined number is dialed and routed to any analog, digital or wireless phone.
- Upon answering the "Alarm call", the user is reported the location of the alarm and is prompted to send an acknowledgement.
- Designed with active matrix color LCD display, VGA resolution and touchscreen interface.
- Communicates with "smart" detectors via RS-422 interface
- Terminal is pre-programmed with ships deck plans so exact location of alarms can be reported
